- **Project Title:** The endangered swift parrot as a model for managing small migratory birds
- **Partner Organisation(s):** Bush Heritage Australia, Forest Practices Authority, Loro Parque Fundación, Tasmanian Department of Primary Industries, Parks, Water and Environment, Zoos SA
- **Project Summary:** Endangered swift parrots use variable locations while breeding in eastern Tasmania and over winter on the Australian mainland. This project aims to develop effective conservation strategies for swift parrots and other migrants using new and long term data and innovative technological solutions [UAVs] to tracking small birds across vast landscapes.
